

Business Combined Policy

Businesses are exposed to various risks including fire damage, burglary, infidelity of employees, injury to employees, etc. Through I&M Bancassurance Intermediary Limited we have a solution for you that covers risks a business is exposed to in one package.

The Business combined policy is an Insurance Package that provides a wide cover incorporating various insurance policies that would be required by a business enterprise.

It covers your Premises (material damage), Assets, Loss of profits (through business interruption by fire and allied perils), Liability to third parties, injury to employees, Money, infidelity of employees, etc.

The objective of the cover is a replacement or repairing lost or damaged items after an unfortunate event and getting back to the business where it was as quickly as possible.

The policy has ten sections. The Fire and burglary sections are mandatory if the premises on which the business is carried out are owned by the applicant. The other sections are optional depending on one's needs.
